SC duplex adapter

Description
Optical fiber adapter is a device that is connected between fiber optic connectors to minimize the loss to the optical link so that the optical energy output from the transmitting fiber can be maximally coupled into the receiving fiber. The SC duplex adapter provided by HYC has the advantages of convenient installation, low insertion loss, good interchangeability, high and low temperature resistance, and is widely used in telecom networks, CATV, FTTX etc..

Features
- Low insertion loss
- High repeatability and high stability
- Meets GR326 or IEC 61300-2 standards
- Meets RoHS and UL 94-V0

Application
- Telecom network
- CATV
- FTTX
